PROJECT NAME:	Inventory Managment System for Retailers

PROJECT DESIGN PHASE-I

SOLUTION ARCHITECTURE

INVENTORY MANAGMENT SYSTEM FOR RETAILERS.

SOLUTION ARCHITECTURE:

Solution architecture is a complex process – with many sub-processes – that bridges

The gap between business problems and technology solutions. Its goals are to:

• find the best tech solution to solve existing business problems.

• describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

• define features, development phases, and solution requirements.

• provide specifications according to which the solution is defined, managed and delivered.

ARCHITECTURE:
